PROFESSIONAL SUMMARY

Passionate Full Stack Developer with hands on experience in MERN stack, .NET, and Angular. Proficient in building responsive web applications and collaborating with cross-functional teams. Recognized for strong problem-solving, effective communication, and attention to detail. Adaptable and committed to continuous learning, with a knack for creative and critical thinking. Seeking to contribute to impactful projects at an innovative organization.

EDUCATION

2024–2026 **Master of Computer Applications (MCA)**
JECRC University, Jaipur

2020–2023 **Bachelor of Computer Applications (BCA)**
Jaipur National University, Jaipur

CGPA: 7.5

TECHNICAL SKILLS

Programming:	Java, C++, HTML5, JavaScript
Applications:	GitHub, postman
Database Management Systems:	MongoDb
Miscellaneous:	Node.js, React.js, Bootstrap, Tailwind, Express.js, Rest Api,
Soft Skills:	Reliable, Accountable, Consistent, Responsible, Disciplined, Integrity

WORK EXPERIENCE

Codeashion)-Full Stack Developer

Jan 2026 - April 2026

- Developed a responsive web UI using HTML, CSS, TypeScript, ASP.NET Web API, and Angular, increasing user engagement by **30%** through improved performance across devices.
- Engineered and maintained backend services with .NET and SQL Server, utilizing **Entity Framework** and NuGet packages to streamline data retrieval processes, cutting retrieval time by **50%**.
- Implemented automated **unit testing** and conducted regular code reviews, ensuring system stability.
- Created **RESTful APIs** for efficient data exchange between client-side and server-side applications, enhancing performance and scalability for high-volume transactions.

PROJECTS

Employee Directory (Technology Used: Angular, ASP.NET Core, RESTful Web Services, SQL Server): [GitHub](#)

- Engineered a web app using SOLID principles, boosting code readability and data retrieval by **40%**.
- Integrated advanced filtering by department, role, and location, increasing search efficiency by **70%**.
- Established secure authentication protocols and role-based access, reducing security incidents by **30%**.
- Developed a dynamic role management system with SQL Server and ASP.NET Core, enabling efficient creation, editing, and assignment of employee roles, streamlining administrative efficiency by **35%**.

Cricpulse – Cricket Live Project (Technology Used: MERN Full Stack, AWS Cloud):

[GitHub](#)

- Engineered a cricket live updates platform using the **MERN** stack, delivering real-time scores and match-related information through a responsive web interface.
- Integrated features for **live scores, match schedules, player statistics, and team details**, enhancing user engagement and content accessibility.
- Applied full-stack development and **AWS Cloud** concepts under industry guidance, strengthening practical skills in scalable application development.
